1Gbps Broadband

For Business Users | Ultra-High Speed

Aries Infinity service is an ultra-high speed broadband service that offers bandwidth of up to 1,000 Mbps or 1Gbps to the business users. The high speed connection is carried over Aries Telecoms' next-generation fibre optic network utilising the latest state-of-the-art DWDM and Metro-Ethernet technology. The service enables super-fast download and upload of data without limitations.

TELECOMS

NETWORKING THE FUTURE

Advantages

- 1,000 Mbps or 1Gbps of internet access
- No buffering hence instantaneous access to information
- End-to-end IPV6
- One million IPV6 addresses at the user disposal
- 100% end-to-end fiber optic connection to the user
- Backward compatible with IPV4 system
- Very low contention ratio
- Very low latency suitable for transaction based financial application and related applications
- Synchronize download and upload speed
- No quota hence non-existence of any fair usage policy
- Build-in security system in the CPE to the user
- Automatic alert for any fault to the user via SMS together with network monitoring system
- Designed for bandwidth hungry Internet of Things (IoT) applications
- Easier connection with "Plug and Play" and user friendly provision
- Completely in congruent to upcoming quantum computing evolution
- Connected to the first and largest IPV6 network i.e Hurricane Electric
- Supported by certified IPV6 engineering team

Service Coverage

Aries Telecoms, through its extensive fiber optical infrastructure is able to provide any service type within its service portfolio to selected point in Klang Valley. With its coverage to more than 1000 commercial and residential buildings, Aries Telecoms stands as one of the biggest fixed line Telcos in Malaysia. Please refer to **Network Coverage** page for more information.

FEATURES		APPLICATIONS	
	End-to-end IPv6 Network with IPv4 compatibility		Office Apps
	Super fast speed of 1Gbps		Cloud Networks
	Unlimited download and upload (no quota)		Content Networks
	One million fixed IPv6 address		Big Data analytics
	100% end-to-end fiber connection		High Definition Video Apps
	Synchronised Upload and Download (1:1)		Social Media

User Requirements

Experience 1Gbps connectivity

- 8GB RAM
- i7 processor
- Gigabit Ethernet interface
- Gigabit enabled LAN with Cat6 cabling
